SKILLS

- Python
- Java
- HTML
- CSS
- C
- Technical Communication
- Problem-Solving and Analytical Skills
- Teamwork and Collaboration
- Time Management

PROJECTS

Developed a user-friendly interface for seamless communication

Developed a user-friendly interface to enhance seamless communication, ensuring intuitive navigation and real-time interaction. Focused on responsive design and efficient data flow for an improved user experience

Security System Application

Developed a security system application to monitor and manage access control efficiently. Implemented features for real-time alerts, user authentication, and activity tracking. Ensured robust security measures and a user-friendly interface for seamless operation.

LANGUAGES

- English (Fluent)
- Hindi (Fluent)

PROFILE

Highly motivated and results-oriented 3rd year B.Tech Computer Science Engineering student at KIIT, with a strong foundation in programming languages, data structures, algorithms, and core CS concepts. Eager to leverage academic knowledge and technical skills in a challenging internship or project to gain practical experience in the software development field. Possess excellent communication and teamwork abilities, honed through coursework and participation in KIIT's vibrant academic environment.

WORK EXPERIENCE

Central Coalfields Limited   MAY 2024-JUNE 2024
Software Developer

Developed the frontend for a university webpage using HTML and CSS, ensuring a clean, responsive, and user-friendly design. Focused on intuitive navigation and modern aesthetics to enhance user experience. Implemented structured layouts and styling for seamless accessibility across devices.

MECON LTD   JAN 2025-FEB 2025
Software Developer

- Oracle APEX Sales and Web Project:
  Developed a web-based sales management system using Oracle APEX, optimizing data handling and workflow efficiency. Designed interactive dashboards and reports for real-time sales insights. Ensured a responsive and user-friendly interface for seamless user experience.
- IT Handling System Project:
  Designed and implemented an IT handling system to streamline issue tracking and support management. Developed an intuitive interface for logging, monitoring, and resolving IT requests efficiently. Enhanced operational efficiency through automation and centralized data management.
